Ngufor Emmanuella A

FULL STACK WEB DEVELOPER
email.com | GitHub| portfolio | LinkedIn| portfolio

SUMMARY

Full-Stack web developer, proficient at writing clean and accessible code. Pair-programming and remote-work aficionado. Fluency in multiple languages, frameworks, and technologies.

SKILLS

Programming languages: Javascript, Ruby, PHP
Libraries & Frameworks: React, Rails
Web Development: HTML5, CSS3
Database Management: SQL, MySQL, PostgreSQL
Version Control: Git**,**
Software Development Methodologies: Agile, scrum
Developer tools: GitHub, Slack, Git Radar
Deployment and hosting: Github pages, Netlify, Heroku
 Professional: Remote pair programming, Teamwork Mentoring

EXPERIENCE

MICROVERSE   Remote
Mentor (Volunteer)   August 2022 – Month, Year
- Mentored junior web developers, providing technical support through code reviews.
- Proposed improvements to code organization to improve code quality and overall performance.
- Provided advice and tips on maintaining motivation to maintain longevity in the program.

YOGAYA INC   **Onsite**
Software developer(internship)   January   – March 2023
- Was part of the front-end team at Yogaya where I had the privilege to work with an amazing team and
      Also to adding new features and functionalities to the "Word Voyage App" that is being used by millions
       Of individuals to learn worldwide for about 13 years to the present day (NB: Kindly check my GitHub repo in
      the organization section to see the app)

- Proposed improvements to code organization to improve code quality and overall performance.
- Provided advice and tips on maintaining motivation to maintain longevity in the program.
- Participated in daily meetings to give reports and feedback about each task done

HIGHLIGHTED PERSONAL PROJECTS   **Remote**
Full Stack Web Developer

                                                                                August 2022 – Present

African pollution **—In this project, I used React-Redux and API to build SPA a website displaying all African countries that are polluted, and when the user clicks on each country or searches for a country its displays the various cities**
                     (JSX, CSS, JavaScript, API, Linters, Netlify, Git, and Github)

Math-magicians—The app I built helps users to do their daily calculations. they can add, divide, multiply, and subtract values
- Built with: (React, JavaScript, HTML, CSS, Jest, Netlify, GitHub, Git, and Linters)

ToDo-List — This app allows users to create, update, remove, and delete items in a list
- Built with: (HTML, CSS, JavaScript, API, Linters, Netlify, Git, and Github)

conference-webpage —In this project, I built a site for a conference displaying major speakers. The page is responsive for both mobile and desktop users.
- Built with: (HTML, CSS, JavaScript, Linters, Git, and Github)

shopping-site —In this project, I built a site for a shopping store displaying major outfits. the page is responsive for both mobile and desktop users.
- Built with: (Angular js, CSS, typescript, Linters, Git, and Github, netlify)

Car renting site — This is a Full-stack application built using the languages: Javascript and Ruby. and with the framework: React and Rails. Data was stored in a database: Postgresql. this is an application that displays cars where the user can log in or create an account, sign in, and select cars whose items are being saved in the database

EDUCATION

MICROVERSE   August 2022 – december, 2023
Remote Full Stack Web Development Program, Full Time
- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Developed skills in remote pair programming using GitHub, industry-standard git-flow, and daily standups to communicate and collaborate with international remote developers.

Higher Institute of Biology and Applied Sciences (ISSBA)   October 2019 – September 2021
- Bachelor's Degree in Dietetics.

Languages
I am fluent in both
- **English and**
- **French,**
- with English being my first language

Dear Hiring Manager,

I am writing to express my interest in the Front-end developer position as an Intern. I am applying for this role because of the awesome potential your company has shown to possess ever since its creation, with the services it provides across the globe. I would like to be part of this company that touches the lives of millions of people worldwide and contribute to the growth of this wonderful company in the social network community with my knowledge as a software developer.

I have a strong foundation in React.js and am proficient in front-end and back-end technologies, including JavaScript, React, Ruby, Ruby on Rails, PHP, Angular.js, Material UI, Tailwind CSS, Bootstrap, Sass, PostgreSQL, Git, and Github, Ruby, etc. I have collaborated with other developers to build projects from simple landing pages to dynamic websites such as MPA and SPA web apps. In these projects, I was able to showcase my programming skills and understanding.

I recently completed my studies at Microverse and I used to be a code reviewer at Microverse, a remote school for software developers, where I reviewed and corrected codes written by junior and aspiring developers. This position has helped me improve my skills as I can now write clean codes following best practices and manage to work with a diverse number of people from different parts of the world.

Before transitioning into software development, I used to be part of the Dietitian team at Yaounde central hospital in Cameroon. There I learned to solve many problems, time management, and collaboration. The skills I acquired in my previous years are helping me since I enjoy learning or updating myself about the latest innovations and research, solving problems constantly. I am good at time management, and I'm improving my skills every day. I'm able to collaborate with partners across different countries to build a specific project, and I've trained myself to work under pressure and submit on time.

Your company has a bright future for aspiring and junior developers like me, with a vision to strive hard towards insisting on the highest standards of product lifecycle development for customers, and creating innovative solutions, constantly promoting growth and learning, It will be an honor to be part of this brilliant team.

Your company encourages creativity, openness, continuous learning, hard work, and trust. These are qualities that align with my personality making me a good asset to the team as I will fit right into its aims and objectives.

With all this being said I'd love to set a time this week to talk about what I could bring to the team. I am excited about the chance to contribute to your company and I'd love to learn more about the opportunity

Thanks. Ngufor emmanuella
